During the last year the Survey issued revised maps of Harford County; soil maps of Carroll and Charles Counties; and completed the reports on the coals of Maryland, the fire clays of Maryland, and the Silurian deposits of the State. Report on the soil survey of Carroll County was also completed as well as special reports on numerous minor matters.

The work of the Survey is essentially that of a bureau of information. Each year it distributes about four thousand volumes and pamphlets, about five thousand maps, and makes several thousand manuscript reports on special matters dealing with the physical features and mineral deposits of the State. To supply up-to-date information it is necessary to continue and revise earlier surveys of different areas and mineral products of the State.

DEPARTMENT OF FORESTRY Advisory Board of Forestry, Calvert Building.

Ex-Officio Members:	
President J. H. U., Frank J. Goodnow	Baltimore
Edward B. Mathews, State Geologist	Baltimore
Appointed by the Governor (terms expire 1924):	
Robert Garrett	Baltimore
Norman James	
George L. Wood	Baltimore
State Forester:	
F. W. Besley	Baltimore
The Comment of the Above members two of who	

The Governor appoints three members, two of whom shall be interested in the advancement of forestry and one a practical lumberman, who, with the President of Johns Hopkins University and the State Geologist shall constitute the Board.

The terms of those first appointed are until the first Monday in May, 1924, and thereafter for two years from the first Monday in May. Ch. 29, 1922.

The Department of Forestry was created and organized to protect and develop the valuable timber and tree products of the State, and to carry on a campaign of education and to instruct counties, towns, corporations and individuals as to the advantages and necessity of protecting from fire and other enemies the timber lands of the State. While the power of the Forest Department rests with the Regents of the University, acting through the Advisory Board, the detail work is in the hands and under the management of the State Forester, who is secretary of the Board, and all correspondence and inquiries should be addressed to him at the Calvert Building, Baltimore.

The State Forester has studied the timber interests of each of the twenty-three counties in detail and the statistics and information collected are published for free distribution, accompanied by a valuable timber map to all who may apply. He will co-operate with counties, towns, corporations and individuals, in preparing plans for the protection, management and replacement of trees, woodlots and timber tracts under an agreement that the party obtaining such assistance pay at least the field expenses of the men employed. An important work of the Forester is to use means to prevent and to extinguish forest fires which are liable to destroy annually thousands of dollars'
